Governor Richardson Issued the Following Statement in Response to Congressman Udall's Letter

“Our research labs are not only important to our national defense and New Mexico’s economy, but to the nation as a whole in providing cutting edge technology to assist in the fields of health care, the environment and clean energy,” said Governor Bill Richardson. Governor Richardson agrees with Congressman Udall that New Mexicans expect their elected leaders to put politics aside and come together to do what’s in the best interest of our national security and the state of New Mexico.
